*                                                                      00002001
*        COMPONENT ID - 360S-AL-531 ALGOL F COMPILER                   00003001
*                                                                      00004001
*        FUNCTION/OPERATION -                                          00005001
*        THIS MODULE PERFORMS THE REAL TRANSLATION OF THE SOURCE       00006001
*        PROGRAM INTO SYSTEM/360 INSTRUCTIONS. THE SOURCE              00007001
*        PROGRAM IS AT MODIFICATION LEVEL 2 AND CONSISTS OF A          00008001
*        SEQUENCE OF ONE BYTE OPERATORS AND FIVE BYTE OPERANDS,        00009001
*        WHICH IS SCANNED SEQUENTIALLY. THE STATUS OF RECOGNITION      00010001
*        OF THE SOURCE PROGRAM IS DESCRIBED BY -                       00011001
*        1. A SEQUENCE OF CONTEXTS (SEE BELOW)                         00012001
*        2. A SEQUENCE OF STACKED OPERATORS (THE OPERATOR STACK)       00013001
*                                                                      00014001
*        THE ACTION OF THE COMPILER IS DETERMINED BY THE               00015001
*        OPERATOR PAIR STACK-SOURCE OPERATOR AND THE CURRENT           00016001
*        CONTEXT. THE OPERATOR PAIR DETERMINES AN ELEMENT IN A         00017001
*        DECISION MATRIX, WHICH IS DETERMINED BY THE CONTEXT. THE      00018001
*        MATRIX ELEMENTS REPRESENT ADDRESSES OF THE COMPILER           00019001
*        PROGRAMS, WHICH PERFORM THE ACTIONS REQUESTED BY ALL          00020001
*        POSSIBLE OPERATOR PAIRS.                                      00021001
*                                                                      00022001
*        THERE ARE THREE CONTEXTS, PROGRAM, STATEMENT, AND             00023001
*        EXPRESSION CONTEXT, AND THE CURRENT CONTEXT IS INDICATED      00024001
*        BY A REGISTER. SWITCHING ING FROM ONE CONTEXT TO              00025001
*        ANOTHER IS IN MOST CASES DETERMINED BY THE STACK-SOURCE       00026001
*        OPERATOR PAIR, IE THE COMPILER PROGRAM ACTIVATED JUST         00027001
*        PERFORMS THE CHANGE OF CONTEXT, BUT IN A FEW CASES THE        00028001
*        SOURCE OPERATOR ALONE DETERMINES THE NEW CONTEXT. IN          00029001
*        THIS LATTER CASE THE OPERATOR IS STACKED TOGETHER WITH A      00030001
*        CONTEXT OPERATOR, INDICATING THE PRECEDING CONTEXT.           00031001
*                                                                      00032001
*        BESIDES THE COMPILER PROGRAMS THERE ARE OTHER ROUTINES        00033001
*        PROVIDING DIFFERENT SERVICES. THE MOST IMPORTANT ARE          00034001
*        (THOSE MARKED WITH * ARE USED AS SUBROUTINES BY THE           00035001
*        COMPILER PROGRAMS) -                                          00036001
*                                                                      00037001
*        SUBSTART - SCAN TO NEXT OPERATOR IN SOURCE PROGRAM            00038001
*        COMP     - CHOOSE COMPILER PROGRAM AND BRANCH                 00039001
*        JBUFFER  - READ A NEW SOURCE PROGRAM RECORD                   00040001
*       *NXTOPT   - GET NEXT ENTRY OF OPTAB                            00041001
*       *SERR     - GENERATE AN ERROR PATTERN                          00042001
*        CPEND    - NORMAL TERMINATION                                 00043001
*        CPERRI   - ABNORMAL TERMINATION                               00044001
*       *GENERATE - GENERATE TXT AND RLD RECORDS                       00045001
*                                                                      00046001
*        A COMPILER PROGRAM IS ALWAYS FOLLOWED BY SUBSTART OR COMP     00047001
*        OR A BRANCH TO ANOTHER COMPILER PROGRAM                       00048001
*                                                                      00049001
*        THE MODULE CONSISTS OF SEVEN CONTROL SECTIONS                 00050001
*        IEX50000 - INITIALIZATION AND SUBROUTINES                     00051001
*        IEX50001 - DECISION MATRIXES                                  00052001

TACHYON LEGACY ASSEMBLER, VERSION 3.1.04

SYSTEM: MVS 3.8    JOBNAME: T1X50    STEPNAME: IEX50    PROCSTEP: X390

Primary input:  lines      1 to    1946 of SYSD.ALGOLF.ASM(IEX50)

SYSLIB library records read: 10333

SYSUT1 work file size: 952733 bytes

SYSUT2 work file size: 271751 bytes

SYSUT3 work file size: 155680 bytes

SYSLIN file records written: 461

TXA000I Return code 0, elapsed time 7.64 seconds.
